

V International Symposium On Inflammatory Bowel Diseases: Proceedings Of The Falk Symposium 101 Held

NEIKO Liver Transplantation Database
MANUAL OF OPERATIONS (GROUP) DEFINITION

FORM: QP (QUALITY OF LIFE) PEDIATRIC Page 1 of 2

Purpose: To document the pediatric (> age 16) patient's quality of life following the initial liver transplant. The QP form will be sent annually to the pediatric patient's parent or guardian on the anniversary of the initial liver transplant.

Person(s) Responsible: Parent, guardian, or primary caregiver of the child.

Source(s) of Information: Parent, guardian, or primary caregiver of the child.

General Instructions: The Quality of Life Form for children is meant to be filled out by the parent, guardian, or other primary caretaker of the transplant patient. This form is **not** to be given to the child to complete.

The QP form is self-explanatory and the parent/caretaker should be encouraged to fill out the form on his/her own. Help may be provided by the LTD coordinator if the parent/caretaker is unable to understand the questions because of educational, cultural, or language difficulties. In these situations the LTD coordinator or interpreter can read the questions to the parent/caretaker and record the answers. If the parent/caretaker does not want to answer a question, he/she should put a mark through that question on the questionnaire.

For consistency, the same parent should complete this form at each timepoint. Even for the older pediatric population, the parent should be the one completing this form. The obvious drawback here is that the child and parent may answer the subjective questions differently.

Once the form is filled out, the parent or guardian should return the form to the DCC or appropriate clinical center in the pre-addressed, postage paid envelope that is provided. Upon receipt of the form, the LTD clinical center coordinator or DCC staff member should check that the form was completed correctly and completely. If the form has not been returned after two months, the clinical coordinator or a DCC staff member will make a follow-up call and this form may be administered by phone at that time.

The answers to all questions on the form should be kept confidential and none revealed to the physician or nurses responsible for the patient's care, or even to the principal investigator for the Liver Transplantation Database. This confidentiality should be maintained even for answers that might seem to have an impact on the child's care and development.

Completion Log:

- 1) Form Received Date - Record the date (month/day/year) that the form is received by mail, or the date that the interview is completed by phone.
- 2) The remaining completion log entries are for data entry use only.
