OPEN UNIVERSITY PRESS

Sexual Health

A Public Health Perspective

"Provides a comprehensive, yet a practical resource on sexual health for public health professionals... Highly recommended for public health programmers and practitioners, and those working in the area of sexual health."

Dr Lale Say, Co-ordinator, Department of Reproductive Health and Research (RHR), World Health Organization, UK

"A great and novel approach which demonstrates theoretically and through many examples, the need to consider issues of sexual health by understanding sexuality not as a fact of nature but as a social construction."

Dr N Bajos, Research Director at INSERM (National Institute for Health and Medical Research), France

This timely book introduces social aspects of the study of sexual health and their application to public health practice.

The book addresses five key themes: *Conceptual and theoretical aspects of sexual health, Sexual health outcomes of risk and vulnerability, Improving sexual health status and Measuring and assessing sexual health status.* The authors consider each of these themes within their cultural and historical context and illustrate topics with international examples and case studies.

Key features of the book include:

- A spotlight on populations rather than individuals, and a focus on the prevention of ill health and promotion of well-being
- A global perspective; the book makes the distinction between developing and developed countries, but recognizes that inequalities are to be found within as well as between countries
- A view of sexual behaviour as socially learned rather than biologically given and so amenable to change and intervention to improve sexual health status
- An emphasis on ways in which risk and vulnerability are products, not only of individual behaviours, but of the social context in which they are practiced

Written by authors with a wide range of experiences, this book will be a valuable resource for public health practitioners and those studying and working in the area of sexual health.

Kaye Wellings is Professor of Sexual and Reproductive Health, and Head of the Department of Social and Environmental Health Research at the London School of Hygiene & Tropical Medicine (LSHTM), UK.

Kirstin Mitchell is Lecturer in Sexual and Reproductive Health at the LSHTM, UK.
